ANNUAL MEETING OF BLAIRMORE CURLING CLUB

The annual general meeting of the Blairmore Curling Club was held at the Cosmopolitan hotel on Thursday night last, when a large attendance was present.

The financial statement showed a credit balance of \$78.40, which, considering the Club had to purchase last year twelve pairs of rocks, is very satisfactory.

The officers elected for the coming season are:

Honorary President—J. Charbonneau.

President—D. G. MacKenzie.

Vice-President—L. L. Morgan.

Committee—H. E. Dunkin, J. P. O'Neill, J. H. Farmer, J. E. Upton, D. McKay, W. Bird and J. McDougall.

The following skips were chosen: D. G. MacKenzie, Dr. Olivier, J. B. Wilson, W. Bird, J. H. Farmer, A. E. Ferguson, J. E. Upton, D. McKay, J. P. O'Neill, D. Lewis, L. Morgan, J. Crowder, J. McDougall, J. E. McLeod.

The rent for Curling Club has been set by the Arena Company at \$600 for the season, which has been accepted by the Curling Club.

The subscription for the year was set at \$15 for rock owners and \$17 for those who use the Club rocks.

There are a number of new curlers this year, also a number of good curlers have taken up their abode in town, and everything points to a very successful year.

Mr. George A. Ryan, superintendent of Waterton Park, was in town today. Mr. Ryan reports that there was a considerable falling off in the number of visitors to Waterton Park this year, due, no doubt, to the labor and money depression.

ANNUAL MEETING OF THE CROW HOCKEY LEAGUE

The annual meeting of the Crow's Nest Hockey League was held at Macleod, on Saturday afternoon last, presided over by George E. Cruickshank, of Hillcrest. R. G. Powell, secretary, of Coleman, was also present.

Blairmore was represented by Messrs. M. G. Rhynas and W. H. Chappell; Coleman by Ed. McDonald, W. Rippon and E. Hall; Bellevue by J. McIntyre and E. C. Costick.

It was decided that the League should remain the same as last year and that as Medicine Hat was not represented at the meeting, their affiliation on could not be considered. The league will therefore consist of Lethbridge, Taber, Bellevue, Pincher, Blairmore and Coleman.

Votes of thanks were passed to the officers of the League for their services last season.

President Cruickshank was re-elected president and R. G. Powell was re-elected secretary-treasurer.

November the 15th was the date decided upon as the final residence date of all players in this league.

R. G. Powell was elected representative to the annual meeting of the A.A.H.A., to be held at Edmonton. The League will affiliate with the senior section of the A.A.H.A.

Some discussion took place on the question of referees, Blairmore being in favor of a paid referee officiating at all games. This, however, was strenuously opposed on account of the expense, and it was decided to conform to the rules of the A.A.H.A. and use one referee for each game to be appointed by the president.

The colors will be: Coleman—Red, white and blue. Blairmore—Blue and white. Bellevue—Green and white. Pincher—Red and white. Lethbridge—Maroon and white. Taber—Not yet decided.

Blairmore delegates objected to the twenty-minute overtime clause agreed on by the league last year, claiming it did not conform to the rules of the A.A.H.A. Coleman delegates were divided on this point, one wanting the twenty-minute period and the other thirty minutes.

The schedule following was drafted by Messrs. Rhynas, of Blairmore, and Blue, of Taber, and was approved.

Wednesday, December 27—Pincher at Taber.

Thursday, December 28—Lethbridge at BLAIRMORE.

Friday, December 29—Coleman at Bellevue.

Tuesday, January 2—BLAIRMORE at Pincher.

Wednesday, January 3—Taber at Coleman.

Thursday, January 4—Bellevue at Lethbridge.

Friday, January 5—Coleman at Pincher.

Monday, January 8—Lethbridge at Taber.

Tuesday, January 9—Bellevue at Pincher.

Wednesday, January 10—Coleman at BLAIRMORE.

Thursday, January 11—Pincher at Lethbridge.

Friday, January 12—Taber at Bellevue.

Monday, January 15—Lethbridge at Coleman.

Tuesday, January 16—BLAIRMORE at Bellevue.

Wednesday, January 17—Taber at Lethbridge.

Thursday, January 18—Pincher at BLAIRMORE.

Friday, January 19—Coleman at Taber.

Monday, January 22—Bellevue at Coleman.

Tuesday, January 23—BLAIRMORE at Taber.

Wednesday, January 24—Lethbridge at Pincher.

Friday, January 26—Bellevue at BLAIRMORE.

Monday, January 29—Taber at Pincher.

Tuesday, January 30—Lethbridge at Bellevue.

Thursday, February 1—BLAIRMORE at Coleman.

Friday, February 2—Bellevue at Taber.

Monday, February 5—Coleman at Lethbridge.

Tuesday, February 6—Taber at BLAIRMORE.

Wednesday, February 7—Pincher at Bellevue.

Monday, February 12—BLAIRMORE at Lethbridge.

Monday, February 12—Pincher at Coleman.

All games to start at 8 p.m. sharp. (Clip this out for reference.)

Boo! you makes you life enjoy

Canada's Place In The World

Referring to the position which Canada occupies as a producer of wealth, F. C. Wade, Agent General for British Columbia in London, has said: "Canada has only one-half of one per cent. of the population of the world. She produces 90 per cent. of its coal, 88 per cent. of its asbestos, 85 per cent. of its nickel, 32 per cent. of its pulpwood, 20 per cent. of its lumber, 20 per cent. of its cured fish, 18 per cent. of its oats, 15 per cent. of its potatoes, 12 per cent. of its silver, 11 1/2 per cent. of its wheat, 11 per cent. of its barley, 4 per cent. of its gold, 1 per cent. of its copper."

Contemplation of the fact that with only one-half of one per cent. of the world's population, Canada is already contributing so largely to the world's wealth, coupled with the further fact that, as yet, and owing to lack of population, the enormous wealth of natural resources which the Dominion possesses have barely been scratched, should convince even the most pessimistic of the great future in store for this country. These figures alone are sufficient to establish abundantly Canada's position in the world.

These figures, however, only begin to tell the story of Canada's present position. Last year Canada's exports to foreign countries reached a total of \$800,000,000, and more than 50 per cent. of this total was made up of "fully or partly" manufactured goods, thus demonstrating that, to an ever increasing extent, the raw materials produced in the Dominion are being utilized in our own factories and shipped abroad in a finished or partly finished condition instead of in their raw state.

At the recent meeting of the General Assembly of the League of Nations an official declaration was made naming the six most important nations in the League, outside the Allied powers of Great Britain, France, Italy, Japan, etc., and Canada was accorded a foremost place among these six.

If this is the position now occupied in the world's estimation and in world commerce and economics by a young and only partially developed country of only eight millions of people, what a wonderful future and position awaits the Dominion when, with several times its present population, and the more complete settlement of its lands and more intensive development of its resources, its representatives sit around the council board of the world!

A realization of Canada's present position, and the growing possibilities of the future, only serve to emphasize the importance and need of now bending all our energies to the task of encouraging immigrants of the right type from all parts of the world to come and assist in the work of nation building in this Dominion. What immigration did for the United States in the last century, it can do for Canada in this century.

The late Sir Wilfrid Laurier once declared that the Twentieth Century belonged to Canada. The Great War delayed the fulfillment of that prophecy, but it was only a temporary interruption, and the final result may well be that, with careful and energetic management, the conditions following the war may be turned to Canada's advantage.

This Dominion needs immigration of a two-fold character; people and capital. Young men and women, healthy and ambitious, are required to settle on our vacant lands; youths are needed to engage in the production of wealth from our forests, our fisheries and our mines; laborers will be needed to build railways, roads and various Government and municipal works; capital is required to make such development possible and provide employment for these people.

The foundation stone of all our national policies should, therefore, be the encouragement of the right type of immigrants, and the providing of all reasonable inducements and guarantees to foreign capital to engage in the task of building up a great and prosperous Canadian nation, and to this great enterprise the Canadian people, East and West, should unitedly devote their best energies.

Children Cry for Fletcher's

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Purgative, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

GENUINE CASTORIA ALWAYS

THE CENTAUR COMPANY, NEW YORK CITY

Britain Still Leads

Relative Strength of Shipping Tonnage of Leading Nations

The new edition of Lloyd's Register of Shipping contains some illuminating figures on the relative strength of the shipping tonnage possessed by the various nations. The figures are really striking, and indicate that, while Great Britain has increased her tonnage only in a slight degree, the United States has made tremendous strides. The advantages gained place the latter country in a position to successfully compete with Britain for the mastery of the world's trade. If tonnage alone counted in the development of a vast commerce, the United States "would" be in a position to threaten the present supremacy of Britain on the seas.

There are altogether 33,935 seagoing vessels in the world, and their total tonnage is 64,770,786. Of this number, 4,832 vessels are sailing vessels aggregating 5,027,534 tons, and 29,103 are steam and motor ships of 61,743,252 tons. Great Britain heads the list with 19,050,000 tons, an increase of only 176,000 tons since June, 1915. The United States comes second with 15,506,000 tons, an increase of 10,639,000 tons since 1914.

In 1914 Germany ranked second to Great Britain with 5,000,000 tons, while now she possesses only 1,732,000 tons. Norway has descended from third place to seventh, and Japan has risen from sixth to third position.

MANY TROUBLES COME THROUGH THE BLOOD

If Kept Rich and Red Good Health Will Be Yours

Nearly all the common diseases are caused by bad blood, weak, watery blood, polluted by impurities. Bad blood is the cause of headaches and backaches, lumbago and rheumatism, debility and indigestion, neuritis, sciatitis and other nerve troubles.

It is bad blood that causes disgusting skin diseases like eczema, and salt rashes, pimples and eruptions. The severity of the trouble indicates how impure the blood is, and how far it is from good. It is a bad blood that causes all the troubles of the blood. It is a bad blood that causes all the troubles of the blood. It is a bad blood that causes all the troubles of the blood.

Some months ago I was in a bad run-down condition. My blood was poor. I had no appetite and my weight left me completely tired out. I fell off in weight. Was altogether in a miserable condition. I was taking medicine, but it was not doing me any good. At this stage a friend who had used Dr. Williams' Pink Pills with beneficial results, advised me to take them, and acting on his advice I did so.

The result can be summed up in a few words: I took the pills for a little more than a month when I can honestly say I never felt better in my life. I can now eat a hearty meal, do my work with comparative ease, and I am restored in weight. I am strong, well, run-down people to give these pills a fair trial.

You can get these pills through any medicine dealer or by mail at 50 cents a box, or six boxes for \$2.50 from Dr. J. C. Williams Medicine Co., Brockville, Ont.

Long-Lived British Industry

British Manufacturers Maintained High Standards in Spite of Strong Temptations

The capacity of British engineering productions to withstand many years of hard work is proverbial. British manufacturers have maintained high standards in spite of the strong temptations of competition with inferior goods which are claimed to be just as good. In keeping up this standard those firms are maintaining a very ancient tradition. A short time ago some rolling mills in the North-east of England were dismantled. These mills were established in 1691, and the old rolls and other machinery are still in existence. The water wheel employed in bygone days to drive the machinery is also still in working order. It was, as a matter of fact, used by the dismantling firm to operate the shears in cutting up the scrap iron derived from the works.

Radium For Ekloms

Dr. Wilfred Grenfell, the missionary doctor of Labrador, has arrived at Liverpool. Describing to a London Daily Mail reporter the arrival of a minute quantity of radium for the relief of cancer sufferers in his hospital, he said there was much excitement among the Eskimo patients and they were greatly surprised to see it arrive in an envelope by post.

Don't be afraid to speak the truth; it is harmless though not guaranteed to be especially pleasing.

Minard's Liniment Lumberman's Friend

NEW LAMP BURNS 94% AIR

Beats Electric or Gas

A new oil lamp that gives an amazingly brilliant, soft, white light, even better than gas or electricity, has been tested by the U.S. Government and 35 leading inventors, and found to be superior to 19 ordinary oil lamps. It burns without odor, smoke or noise—no pumping up, is simple, clean, safe. Burns 94 per cent. air and 6 per cent. common kerosene (costless!).

The inventor, T. V. Johnson, 579 McDermott Ave., Winnipeg, is offering to send a lamp on 10 days' FREE trial, or even to give one FREE to the first user in each locality who will help him introduce it. Write him today for full particulars. Also ask him to explain how you can get the agency, and without experience or money make \$250 to \$500 per month.

For Once He Was Wrong
"This hotel," declared the clerk, "is run on the theory that the guest is always right."
"Fine," declared the man who had been there a week. "I don't owe you a cent!"—American Legion Weekly.

MOTHER!

Clean Child's Bowels with "California Fig Syrup"

Even a sick child loves the "fruit" taste of "California Fig Syrup." It is the little tongue is coated, or if your child is listless, cross, feverish, full of colic, or has colic, a teaspoonful will never fail to open the bowels. In a few hours you can see for yourself how thoroughly it cleanses the entire system, purges out the bile and waste from the tender, little bowels and gives you a well, playful child again.

Millions of mothers keep "California Fig Syrup" handy. They know a teaspoonful today saves a sick child tomorrow. Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother, you must say "California" or you may get an imitation fig syrup.

Good Habits to Form
Get the habit of economy but not stinginess.
Get the habit of always hoping.
Get the habit of paying as you go.
Get the habit of relying on yourself.
Get the habit of speaking correctly.
Get the habit of closing doors gently.

An iceberg that rises 100 feet above the water stretches 700 feet below it.

Indigestion, Gas, Upset Stomach

Instantly! "Pape's Diapiesin" Corrects Stomach so Meals Digest

The moment you eat a tablet of "Pape's Diapiesin" your indigestion is gone. No more distress from a sour, acid, upset stomach. No flatulence, heartburn, palpitation, or misery-making gases. Correct your digestion for a few cents. Each package guaranteed by druggist to overcome stomach trouble.

Few Negroes Have Cancer

Where the percentage of negro population is highest, the cancer death rate is lowest.

A Visit to the Old Land

Canadian Pacific Through Service for Old Country Christmas and New Year Travel

For the accommodation of Christmas and New Year visitors to the Old Country, the Canadian Pacific Railway will operate special tourist sleepers from Edmonton, Calgary, Saskatoon, Moose Jaw and Regina, to connect with special trains from Winnipeg 9:20 a.m. on Saturday, December 8th, operating through to the ship's side at West St. John, for the sailing of the S.S. "Montcalm," December 12th.

Special through tourist sleepers will also be operated for other December sailings as follows:

For the S.S. "Tanais" to Liverpool, sailing from St. John, December 1st. Through tourist sleepers from Calgary, Moose Jaw and Regina, December 27th, and from Winnipeg, December 29th.

For the S.S. "Victoria" to Glasgow, sailing from St. John, December 7th. Through tourist sleepers from Calgary, Moose Jaw and Regina, December 3rd, and from Winnipeg, December 4th.

For the S.S. "Melita" to Southampton, sailing from St. John, December 9th. Through tourist sleepers from Calgary, Moose Jaw and Regina, December 5th, and from Winnipeg, December 6th.

For the S.S. "Montcalm" to Liverpool, sailing from St. John, December 12th. Through tourist sleepers from Edmonton, December 7th; Saskatoon, December 8th; Calgary, Moose Jaw and Regina, December 8th, connecting with special train from Winnipeg 9:20 a.m. Saturday, December 9th.

For the S.S. "Metagama" to Glasgow, sailing from St. John, December 15th. Through tourist sleepers from Calgary, Moose Jaw and Regina, December 11th, from Winnipeg, December 12th.

This service will enable those desiring to visit the Old Country, a direct through service on the Canadian Pacific, eliminating the changing of trains and transfers.

Any Canadian Pacific Agent will gladly furnish particulars of sailings, rates, etc., obtain passports and arrange reservations on through sleepers.

The Western Harvest
One can look at the western harvest from any point he likes, but the fact remains that there are half a billion dollars of new money dug out of the earth. That ought to greatly help business—Manitoba Free Press.

Sleep is the great nourisher of infants, and without peaceful sleep the child will not thrive. This cannot be got if the infant be troubled with worms. Miller's Worm Powders will destroy worms and drive them from the system, and afterwards the child's rest will be undisturbed. The powders cannot injure the most delicate baby, and there is nothing so effective for restoring the health of a worm-torn infant.

Alberta Homestead Lands
6,000,000 Acres Available for Entry in the Edmonton District

From figures given in a map issued by the Federal Department of the Interior, there are 50,311 quarter sections or \$900,000 acres available for entry in the Edmonton district of the province of Alberta. These lands are situated in the districts north, west and southwest of Edmonton, and largely within a radius of from fifty to one hundred miles. In addition there are millions of acres to be had in the Peace River and Grande Prairie sections of the province. Some 42,677 quarter sections are available for settlement in the country north of Edmonton.

You Can Get Back Your Grip On Health

A statement that will be of much concern to thousands of people in Alberta was made recently by William Williamson, a veteran of the World War, residing at 215 Tenth St., North-east, Calgary.

"I believe in giving everything its due," he continued, "and I want to say right now that I just can't praise Tanlac too highly for what it has done in my case. For some time I had been in a badly run-down condition. I had absolutely no appetite and had fallen off seventeen pounds in weight. My nerves were all undone. I could not get sufficient rest at night and got up mornings feeling as tired as when I went to bed. I was also bothered a great deal with rheumatism in my legs and ankles, which would often get so stiff and sore I could not walk without great pain."

"So much was being said in the papers about Tanlac that I went to a drug store and bought a bottle. I was now enjoying splendid health and do not hesitate to recommend Tanlac to anyone."

Tanlac is sold by all good druggists.

In every way
Safe, sure, silent, harmless to children, strong, matches with best in every way.
The Home Comfort Range

Teaching Women to Vote
A school for women where they may be instructed in the duties and responsibilities of voting, has been conducted during the summer at Oxford, England. So many applications were received that some had to be turned away. The course made a specialty in the duties of magistrates.

W. J. BARTLETT, PUBLISHER

Blaimore, Alta., Thurs., Oct. 19, 1922

GO BETWEEN FOR CREDITORS ALL OVER ALBERTA

EDMONTON, Oct. 16.—Arrangements have been made by the Alberta government for a talk-over plan of intervention between debtors and creditors in all parts of the province. As soon as E. J. Fream, who has been newly appointed to a commissioner-ship of the public utilities board, returns from Winnipeg, he will be asked to set about immediate extension over the whole province of a part of the work he has been doing in the southern drought area under the terms of the Southern Alberta Relief Act.

This is explained as not meaning that the drought area is being extended in any way beyond its boundaries, which were, explicitly set forth in the act passed by the last legislature. Mr. Fream will work in an entirely voluntary way as an intermediary between debtors and creditors and in that respect his work will be similar to what he has already been doing in the south, with the exception that no staying orders will be issued in any of the northern cases.

'LEST WE FORGET'

Poppy Campaign Headquarters are being deluged with orders from every part of the province, ensuring that the campaign this year is more popular than ever. The original estimate of the number required for the province was one hundred thousand poppies and five hundred wreaths. Orders received to date total over this amount and a supplementary order has been wired into the manufacturers. Every citizen should wear a poppy on Armistice Day in memory of those who lie, amidst the crosses in the fields of Flanders.

The branches of the Great War Veterans Association in districts where they are organized are handling the sale of these poppies, but in unorganized districts various bodies are handling the campaign, including branches of the I.O.O.F., Canadian Red Cross Society, various churches, and other Ladies' and Girls' Associations.

Poppy Campaign Headquarters, 207-8 Oddfellows' Block, Calgary, will be pleased to hear from any individual or association throughout the province who would care to handle this campaign.

Poppies are made in Canada by disabled veterans and their dependents, and the entire proceeds will be devoted to relieve distress amongst veterans and their dependents this coming winter.

Poppies are in two sizes, retailing at 10c. and 5c. respectively. There are also small wreaths, large wreaths and palm sprays, retailing at \$3.50, \$4.00 and \$4.50, respectively.

Advertising material, pamphlets and posters will be supplied with each order given.

A MAMMOTH EAGLE

An eagle of very large dimensions was shot by E. Chibellon near Goat Mountain on Monday last. The bird was noticed sleeping on the branch of a large tree and Chibellon disturbed it with one shot from a 12-gauge shotgun. It measured 7 feet 6 inches from tip to tip of the wings. The prize was handed to The Enterprise on Monday and is now being mounted by a Calgary taxidermist.

A forest of pines and firs which took two hundred years to grow may be destroyed in half so many minutes by a forest fire.

SMALL FRY, THIS!

While the letter quoted below was not intended for publication and is not worthy of any comment on our part, we publish same in order to give our readers an opportunity of further determining the mental caliber of its author:

"Lindsay, Alberta, Oct. 13, 1922.
Editor, The Enterprise."

Dear Sir—I got your kind and capital reference to myself in your paper of last week. Among other things you say that yours truly is a "practically irresponsible," whatever that may mean. Sometimes I am inclined to think that even the wisest of us are touched with "irresponsibility." For instance, you doubtless know a man who was at one time so utterly "irresponsible" that he suffered himself to lead up to his ears on "boozes," when his companion took occasion to decoy him into a certain dentist's office and where first one and then the other took great pleasure in sitting on his chest—manly chest—and extracting his teeth, slowly and deliberately. For downright "irresponsibility" that stunt on the part of that "wise" brother takes the bun.

In regard to the branding of the foreign element in the Pass, not as criminals, but as "possessing morals lower than the beasts of the fields," is the whole truth and nothing but the truth. Furthermore much of the lawlessness in Blaimore should be charged very directly to the door of such men as yourself, men who have not the necessary starch in their backbone to ever be heard vindicating those things which stand for all that is best in a community, but use the space entrusted to them as editors for the "springing" of jokes which to say the least are "risque," some call them by a much more harsh name than that.

Had you been of sufficiently "responsible" character to have taken your place in Blaimore as a "man" and kept yourself above hobnobbing with men of the stamp of "Pie" there might have been one less murder in the Pass.

Now, Bartlett, I think too much of the ethics of journalism to reply to your childish and peevish paragraphs in the Enterprise, in my paper, so take this method of equating you away.

Possibly you are not aware of it, but the truth is that you have long been the "big joke" of intelligent people in the Pass, and it is time some one "wised" you up.

An avowal,

H. C. DILLINGHAM."

CHARGES "ENTERPRISE" WITH ATTACK

We are somewhat interested to note from the Calgary "Albertan" that the attorney-general's department has decided to take no action in connection with "attacks on the Alberta Provincial Police made in the Blaimore Enterprise."

As far as we know, any attacks that we have ever made directly against the department of attorney-general or the provincial police were warranted, and it is our purpose, in the interest of the public we represent, to at any time bring to the attention of that public any matters that we may deem worthy of criticism.

In this particular instance, we do not know of any action of ours of late that could be looked upon as an attack against the Alberta provincial police.

REBEKAHS TO HOLD SALE OF WORK

A sale of work, tea and whist drive will be held in the Oddfellows' hall on Thursday of next week under the auspices of Crowfoot Rebekah Lodge.

We understand that the sale will be held from three o'clock and that tea will be served meanwhile. At 8 o'clock a whist drive will be held.

A dance will be given in Tuesday's hall at Cowley on the night of Friday, October the 27th. Mrs. Altematt's orchestra will furnish music.

PARTNER WANTED

Partner wanted to take half interest and full management in a big paying business to be started in Blaimore. Must be able to invest \$1200.00 in the machinery for the business which he will control. This business in other places is making over 60 per cent profit on the turnover. It is a much needed industry and has no opposition. An excellent opportunity for a young man to start for himself in a strictly cash business. No experience necessary. For particulars write stating past employment to D. A. Dawson, 185 River Ave. Winnipeg, Man.

Rev. Harry Peters, of Bellevue, addressed the Men's Own at Coleman on Sunday afternoon last in his "Impressions of The Old Country."

Necessity Of Ensuring The Use Of Pure Seed By Farmers Of The West

The Canadian Seed Growers' Association constitutes an organization of experienced seed growers, many of whom devote their principal efforts toward the multiplying and maintaining in their purity and productiveness the "Elite" stock seeds that are produced by expert plant breeders who are for the most part employed in connection with Government Experiment Stations, both Federal and Provincial. Seed growers who are operating under the direction of the association have come to be regarded as the important link between the plant breeder and farmer in general. Without the service of our growers of registered seed, it is reasonable to conclude that much of the excellent results derived from the work of plant breeders would have been dissipated and, in consequence, farmers in general would not receive the full benefit from their work.

Heretofore, local demand for registered seed absorbed a large proportion of the total quantity produced within the district where it was grown. The recent enlargement of the plan for registration has made it practicable to develop seed production centres with quite extensive acreage of seed crop under superior conditions of soil and cultural practices, and particularly favorable to the kind of crop. Thus the total production of registered seed and of extra No. 1 seed grown from registered seed, has been, and is being, increased in geometric ratio as compared with ten years ago. It is important that effective measures be adopted to ensure the efficient distribution and the general use of all the best quality of seed produced by our growers, and in addition that any surplus remaining in favorable years of production be made available for export. Our best quality of northern grown seeds have come to be highly regarded in many of the States to the south.

Unfortunately, because of the want of proper organization, the distribution of registered seed, and of extra No. 1 grade of seed which is grown from registered seed, has not been fully satisfactory. It was this fact that led to the passing of a resolution at the present annual meeting of the Canadian Seed Growers' Association recommending the formation of organizations for assembling, cleaning, storing, financing and marketing of superior quality seeds of all kinds of our staple crops, and that, pending the organization of a Canadian Seed Growers' Co-operative Association, the Seed Purchasing Commission be given authority to provide a service for selling the surplus of such seed.

The constitution and charter of the Canadian Seed Growers' Association do not provide the authority necessary to enable it to enter into the field of merchandising on behalf of its members. Being supported in part by the Government, it would be quite improper for that association to enter into competition with other seed companies engaged in the seed business. The Government now has one fairly well established and experienced organization for the merchandising of seed grain, the Seed Purchasing Commission, and it is not generally regarded as a proper function of a Government, it is to be expected that as soon as co-operative endeavors in the assembling and distribution of good seed have become sufficiently well developed to meet the very real needs of agriculture, particularly in the prairie provinces, the operations of the Seed Purchasing Commission may thereafter be discontinued as a Governmental institution.

The Provincial Government of the province of Quebec several years ago established and now have an excellent assembling, cleaning and distributing plant at St. Rose's Junction, Quebec. The Provincial Government of British Columbia have more recently developed and are in process of guiding the development of an assembling, cleaning and distributing plant at Penticton, B.C. The farmers' co-operative organization of the province of Prince Edward Island have an efficient seed warehouse and cleaning plant at Kingston, P.E.I. The grain growers of Saskatchewan have had under consideration for several years the setting apart and equipment of two or more of their elevators for the assembling, cleaning and distribution of registered and extra No. 1 seed grain.

The latest very satisfactory information is that the Minister of Agriculture for the province of Alberta has indicated that for that province he will provide on the basis of service at cost, well

equipped warehouse facilities for the assembling, cleaning and distribution of registered and extra No. 1 seed grain and other seeds that may be grown in the province of Alberta. In the early future there will be need for similar efficient plants for the assembling, cleaning and distribution of registered and extra No. 1 seed at Winnipeg, Port Arthur and Toronto. Their advantage to the seed growers and their pronounced benefits to farmers in general have been, and will continue to be, so obvious, that we may be reasonably sure of their early development at all centres where they are really needed and without the Canadian seed growers doing more than demonstrating their usefulness and the sound economy of their development and operation on the basis of service at cost. These specialized seed cleaning and distribution warehouses ought not to become a public charge unless, as frequently happens their development gains a momentum in excess of requirements with the result of having warehouses where they ought not to be established.

Retires After Long Service

Major West Served With Scarlet Riders in Peace River

A pioneer of the Royal Canadian Mounted Police and the first officer to be appointed in the Peace River country, Major C. H. West, after 34 years service with the force, retired recently on pension.

Major West was a varied career with the force, acting in many capacities during his long service. The history and traditions of the force appealed to him, and after studying medicine in London, the Major came to Canada in 1888 and immediately joined the Mounties. He graduated in medicine and surgery in the North West Territories and six years later he came to Prince Albert for the first time with the rank of hospital surgeon.

In 1900 he was appointed medical officer at the time when the Dominion Government made its treaty with the Indians in the Athabasca country and the following year he had charge of the R.C.M.P. in the Peace River country. During this period he was for long practically cut off from civilization, receiving mail only about once a year. Mrs. West, a niece and the late Senator T. O. Davis, and the daughter of Col. C. E. A. Patterson, of Montreal, were of the first white women to visit the post.

After occupying many posts throughout the west, in 1919 he was again returned to Prince Albert. The Major is now living in British Columbia.

Edison Remedied The Trouble Made An Electric Device That Would Light A Cigar

At the banquet in New York the other night when Thomas A. Edison was presaged with the freedom of the city, Richard Klob, one of the guests, who is 80 years old, told his table companions how he used to keep a restaurant at 164 Pearl Street, where Mr. Edison was in the habit of eating luncheon. After the successful experiment of forty years ago the inventor came in the next day and asked: "How were the lights, Dick?" "All right," I replied, "but they won't light a cigar. Do you know?" Edison looked serious. "That's so," said he. "I'll have to fix that." And three days later he brought in to me a little wired device with which my customers were enabled to light their cigars.

Cross-America in a Flash

The distance between the east and west coasts of the United States is less than one-fifth of a second! By radio. That's computed from the theory, according to leading scientists, that radio waves travel at the speed of light, 186,000 miles a second. The Taj Mahal, at Agra, is said to be the world's most celebrated monument. Built of white marble and inlaid with precious stones, it cost \$10,000,000, and 20,000 men, it is estimated were occupied 20 years in the building of it.

The stores on the majestic, the world's largest liner, include 16,000 cups, 30,000 plates, 2,400 teaspoons and 8,000 tumblers.

Better keep out of trouble; all that your friends will do to help you is to say "It's too bad!"

Neither poverty nor riches can make a man

Fast Moving Plane Can Collect Mail

Bags Are Lifted By Hook Attached to Cable

The research department of the Air Ministry are experimenting with a device by which mail bags can be collected from the ground by an aeroplane travelling at full speed. It is hoped that, before long, aeroplanes will be able to pick up the mails at intermediate stations, instead of all letters having to be sent to Croydon as at present.

Collection is made by means of a cable lowered from the aeroplane as it nears the mail station. Attached to the cable is a device which hooks the mail bags. They are then hauled up to the aeroplane which does not need to reduce speed. Tins of petrol can be picked up in a similar fashion.

It may be possible, when the device is perfected, for aeroplanes to collect mails from the roofs of post offices.

The research department attaches considerable importance to the tests, which were carried out with great secrecy and attended with success. It is understood that more extensive experiments are to be carried out. Ordinary aeroplanes are used, and the work could be done just as easily with air liners, such as those now operating on the Continental route, as with a single-seater military machine.

Earliest Idea of Moving Pictures

Englishman Has Traced Growth From Time of Confucius

The earliest idea of a moving picture was recorded in the time of Confucius, the Chinese philosopher who lived 500 years before Christ. At least this is the deduction drawn from his studies into the question by Will Day, a well-known figure in the English film world, who has exhibited in London a collection of relics and machines tracing the growth of the moving pictures from the first primitive idea to its present form.

The "shadow shows" of the time of Confucius are the first of all known endeavors to present animated pictures. From this early time, however, there was a long period of inactivity in development, for the next record of progressive achievement is found in 1646, when Athanasius Kircher published a book in Latin entitled "Ars Magna lucis et umbræ," in which a description and illustration is given of a moving picture which the author had evolved with mirrors and a tallow candle for illumination.

Included in the collection is the original disc which Eadweard Muybridge used to settle the controversy between two American millionaires on the 'Alto Palto' racecourse as to whether the four legs of a trotting horse were off the ground at the same time.

The experiments which Muybridge carried out is said to have cost the University of Pennsylvania 40,000 pounds, but the fact was proved that a horse did actually lift all four feet simultaneously.

Excellent Phone Service in London

Reading through a London telephone directory, a New York man said: I find instructions to users on each page. One instruction reads: "Don't shout 'Hallo' at the operator." It was my impression that Britishers answered the phone with "Are you there?" All I have heard answered with the good old American "Hello." And the operators—telephoneists, they call them—respond with the same salutation. The telephone service is excellent.

"Mourning postage stamps" now on sale in Germany bewail the loss of the German colonies. One example shows a flag at half-mast and has a wide black border.

It pays to patronize home industry. Buy from the merchants in your own town.

Stone Age Mining District

Mining Carried on at Isle Royale 1,000 Years Ago

Further details concerning the uncovering at Isle Royale of what are believed to be remains of homes used by miners of the stone age, were given by William F. Ferguson, of Franklin, Pa., who was in Port Arthur while on his way home after his summer's activities.

Isle Royale is definitely placed as a stone age mining district," he said.

"Mining was in progress there at least 1,000 years ago; how much longer, we don't know, but we found pits six feet in diameter growing on the ancient rock dumps. I have long believed that there were villages or towns in that vicinity, and I have been hunting for three years for remains of one. This summer we found an area covering at least half a mile in width and two miles long, over the whole of which we found remains of human habitations. These were largely pits, which had been dug for homes. They ranged from eight to ten feet deep, and were protected by carefully built stone walls, which kept men free from winter. Some of these walls had been pushed and heaved by the forests of passing years. Apparently they had been covered by wooden roofs. Some of them were 20 by 40 feet in diameter, these evidently being communal dwellings. We found one 50 by 40 feet that had evidently been a fort.

"These pits had been east and west and north and south, the long sides being straight north and south, indicating that the people who built them perceived the relation of the stars and the sun to direction.

"These people mined in solid rock the whole island over, but did not dig their shafts more than about 20 or perhaps 25 feet deep. Their tools were of green-ashed-wood, some of great hardness, which are found on the shores of Black Bay, on the north shore of Lake Superior, but not on Isle Royale.

Triumph Of Modern Dentistry

People Can Be Supplied With Teeth Any Shade

The manufacture of sets of jet black false teeth represents an out-of-the-way side of British enterprise. It will be news to most people that there is a definite trade in black teeth between England and the Orient, rendered necessary by the practice so popular east of Suez, of chewing betel nut. As a masticatory the betel nut leaves chewing gum far behind, for it is reckoned that one-tenth of the human family indulge in it. It stains the teeth of its voracious black as ebony. Hence, when they need artificial teeth to replace losses those teeth must be black. Examples of these are to be seen at the International Dental Exhibition, which opened recently at the Imperial Institute, South Kensington.

A definite side of modern dentistry is represented by these black teeth. No longer is it necessary for clients to accept teeth which stand out in challenging distinction to their neighbors and proclaim their artificiality to the world. Every shade and shape is now matchable. Even the boy's who for thirty years has been "rolling the quid," can be supplied with teeth bearing the counterfeit stains of tobacco juice. The ordinary person has twenty-five different shades at his disposal, and shapes seem to be innumerable. Even teeth with make believe gold fillings are supplied.

All Kinds

California and New York were arguing.

"You're always bragging about your climate," complained New York. "I wish you'd tell me what there is in it so superior to mine." "No comparison," declared California scornfully. "You haven't any climate at all. All you have is different weather."—American Legion Weekly.

A Glimpse Of The New Canada Described By A Visitor From London

New Governor of South Australia

Appointment of Sir George Bridges Recalls Memorable Incident of War

Major-General Sir George Molesworth Bridges has been appointed Governor of South Australia, succeeding Lieutenant-Colonel Sir William Welgell. The latter resigned the position because he said he could not live on his salary and had not sufficient private means to afford the luxury of maintaining such a position.

His successor, Sir George, is known in the British army as the "Toy Drum Hero!" That term has not been applied to him in derision, but in recognition of a memorable incident of the war in which he displayed great gallantry.

After the action at Le Catiau, in 1914, the British army landed on its great fighting retreat, and men were dropping out from sheer exhaustion. Major Bridges, as he then was, went back to St. Quentin to round up 250 stragglers.

He found them in a state of collapse. At a little village shop he bought a toy drum, and falling the men into line with the toy drum and a penny whistle to serve as a band, he marched them off, laughing in spite of their weariness. They kept on marching for 28 miles.

Sir George was the military member of the British mission to the United States in 1917, and head of the British War Mission to the United States in the succeeding year.

Free Speech in England

Taking a Broad View of the Privilege Enjoyed Under the British Constitution

Those who follow such cases in the newspaper reports must have noted with concern the growing frequency of police prosecutions for wild and irresponsible language. A man was charged recently at the Birmingham police court under a statute of Edward the Third, as a disturber of the peace, in consequence of his comments on the action of the judge who refused to allow Sir Henry Wilson's murderers to make a statement. When the stipendiary magistrate pointed out that it was legitimate to comment on that action, the prosecuting counsel agreed, but he stated that "they had to take into consideration the time in which we lived and what was likely to be the effect of the man's remarks upon those to whom they were addressed."

There is a tendency to interpret this doctrine in a dangerously wide and a dangerously puritan sense. We are glad to see that the Birmingham stipendiary magistrate asserted good constitutional doctrine on this occasion and discharged the accused. We have no wish to see the old German procedure introduced into English political life, with policemen taking shorthand notes with a view to prosecuting. This spectacle is becoming too common in some English towns.

This is not the English way of keeping a public peace, and the old English double of such methods can find ample justification in a comparison of our experience with that of other countries. It would be no bad thing if the police authorities were made to pass an examination on Erskine May's "Constitutional History."—Manchester Guardian.

Buoys Used at Sea

There are forty different types of buoys used at sea, each of which has a meaning of its own. That of a green color, for instance, marks a wreck, while others similarly distinctive show where rocks, shoals, sandbanks and deep-water channels occur.

Writing in the London Times, of which he is managing director, after a return visit to his native country, Sir Campbell Stuart has most interesting comments to make on Canadian affairs at the present day.

In returning to Canada this last summer I had a "fixed intention to revisit the great Prairie Provinces and see for myself the new Canada that had developed there since I was a boy. It had presented the realization of that wish and I had to content myself with remaining in my native Province of Quebec. I do not want it to be thought that I stumbled at having to stay there, for I wonder anywhere in the world the traveller can find such peace and contentment as in the back country of French Canada. Labor difficulties are practically unknown, and the simple, picturesque, healthy life of the French-Canadian habitant always proved to me that they had learned the secret of happiness. They seem to have learned also the secret of prosperity. The Province of Quebec had a surplus this year of about \$600,000, a surplus which, according to M. Taschereau, the Provincial Premier, is equal to the surplus of all the other provinces for the last five years.

It was a very different Canada to the one I had known. I found the young men were more interested in public affairs than before the war. I found the consciousness of nationhood more apparent. I found a greater realization of the fact that the Canadian people were no longer on the east or in the west, English or French, to guide our destinies at this critical hour in his history. I found a real desire to remain a nation in the British League of Nations, but at the same time a very proper wish to look after their own affairs. The important international question which interests Canada today is the appointment of a Canadian minister to Washington. The order-in-council provided that in the absence of the British Ambassador he should be in charge of the Embassy. In my opinion the Minister will have enough work to do to look after the affairs of Canada, to whom he is responsible without embroiling her in world quarrels. Could not the British Counsellor at Embassy become the Charge d'Affaires in the ordinary way? That Canada did want a Minister there I have no doubt. Canada's interests at Washington are enormous, and the man who is charged with them should understand in every detail the feelings and the wish of the Canadian people.

Great Britain Has All-Steel Airplane

Is Less Vulnerable to Bullets and Virtually Fireproof

Great Britain possesses an all-steel bombing airplane, a distinct departure in aerial construction. Except for the canvas wings the entire machine is built of steel. Nevertheless, it is 4 per cent lighter than a wooden airplane of the same dimensions. The claim is made that this machine shows a great advance over German airplanes constructed of aluminum alloy, which is said to lack the strength of British steel. It is equipped with two Napier 1,000 horsepower engines. Although designed as a fast long-distance bomber, it is said to be as easy to maneuver as a little fighting scout. This is because of its steel construction, which permits the grouping of all weights.

Advantages claimed for all-steel airplanes are greater strength, increased load-carrying capacity, ease of manufacturing in large numbers, and the fact that they are less vulnerable to bullets and shrapnel while flying, and also that they are virtually fireproof.

War Waste

The U.S. fleet of wooden ships built during the war at a cost of \$300,000,000, was sold recently for \$750,000. And the ships were useless. But this example of war waste is not as bad as the American war record in aviation. More than \$600,000,000 was spent on the production of air machines, and not an American air machine was used in the war.—Hamilton Herald.

In Japan a Species of Mulberry Tree

is grown for its bark used in paper making.

PROVINCE IS PARTNER OF BOOTLEGGER

A dispatch from Victoria states that "the Dominion Liquor Company, Limited, has been granted permission by the liquor board to transfer its liquor warehouses from Vancouver and Creston to Greenwood, down close to the international boundary line."

We are glad to see the liquor board come out from under cover and do business in the open. Encouraging liquor houses in close proximity to the boundary line indicates that the board is out to sell booze to the bootlegger. The Trail News before the plebiscite predicted that if the "moderation" act passed it would make the government a partner in the bootlegging business and our prediction has come true. Instead of having a dignified and law-abiding conduct of our liquor business we have hit the bootlegger and are now wallowing in the mire.

This condition, though, has followed every attempt made at government control of liquor on the continent, and this fact is potent to every student of history. The name "Moderation Act" is a misnomer. There is no moderation about it. A comparison of figures, as compiled by the Vancouver Sun, shows that the consumption of beer has declined during the life of the present moderation act and that hard liquors have taken the place of drinks lighter in alcoholic content.

Before prohibition the annual beer sales in British Columbia approximated \$4,250,000.

During prohibition the approximate sales jumped to \$5,000,000. This was chiefly near-beer, lighter in alcoholic content than the present beverage.

Under the present act, beer sales fell during one year to \$2,400,000, while total liquor sales, including hard stuff, increased to \$7,090,000.

The Moderation Act, instead of controlling liquor, is encouraging its consumption in the worst form.

MINERAL PRODUCTION

According to a recent report of the Dominion Bureau of Statistics, the total value of the minerals produced in Canada during the first six months of this year amounted to \$57,682,944, a decrease of little more than \$7,000,000 from the corresponding period in 1921. This showing may, under the circumstances, be considered as highly encouraging, for there has been a much greater output of gold, silver and lead, and the actual decrease in coal and in copper and nickel are more than accounted for by labor conditions in the one case, and depressed markets in the other. The production of gold amounts to 585,633 fine ounces, valued at \$12,110,242, as against 586,291 fine ounces, valued at \$8,194,129, for the first half of 1921. Over 81 per cent, of this came from the mines of Northern Ontario, where there has recently been a marked increase of activity. It is estimated that these mines produced during last August gold to the value of nearly \$1,840,000. The amount of silver produced in Canada during the first half of this year was 8,905,454 fine ounces, valued at \$5,997,199, as compared with 6,548,481 fine ounces valued at \$3,914,552, during the first half of 1921, the largest increases taking place in British Columbia and the Yukon Territory. There is every indication that the mining of precious metals will continue on a satisfactory basis and that a revival in the copper-nickel industry is imminent.

The output of Canadian coal during the first half of 1922 amounts to 6,098,316 tons, as against 5,762,631 tons during the corresponding period of 1921, but these figures do not convey a correct idea of the increased activity of the last month or so. Indeed, the latest reports from Nova Scotia, Alberta and British Columbia indicate that the collieries are now being operated at full time. During the coal strike in the United States, the mines of Western Canada had an excellent opportunity of increasing the market for their output, and the trade figures quoted below indicate that there has recently been a considerable improvement in the volume of coal exported.

On the other hand, importations of anthracite coal from the United States remain on a famine level and will in all probability continue to be so until next month. Some assurance of a reasonable supply at reasonable prices has been given by the Pennsylvania Fuel Commission, which has to a certain extent safeguarded the public against exploitation by fixing the price at the pit's mouth at \$3.50 a ton, and has allotted to Canada 60 per cent of the amount purchased by her in 1921. As the latter amounted to 4,553,000 tons for the whole calendar year, Canada may now expect to receive slightly more than 2,730,000 tons.

Considering the disadvantages under which the iron and steel industries have been laboring, the production of 10,000 tons of steel ingots and castings for all Canada during August is a creditable showing, being only 4,000 tons less than the output of the previous month and 26,000 tons more than that of May. The demand for iron and steel products has greatly improved during the last twelve months, and there is little doubt that when the coal shortage is made up, his industry will experience renewed activity. It is significant that our imports of iron and steel billets during the six months ending June last amounted to 138,000 cwt., as compared to 28,000 cwt. during the first six months of the previous year.

ADVERTISING

There exists in this town a few people who have antediluvian ideas about newspaper advertising and who persistently oppose an investment of a dollar for advertising purposes, be it for a church, dance, bazaar, concert or garden party. We have known them to pay high prices for orchestra goods for sale or talent without a question, but when it came to advertising and printing matter they developed the shylock habit. The announcement for the holding of any of the above features they consider a news item for the paper and it is outrageous to charge for same. The idea is preposterous in their minds. Meanwhile the event takes place and as a result of this strange attitude the attendance is small and financial results a failure. It is a recognized fact that for successfully conducted functions, 10, 15 or even 25 per cent of the cost should be spent in advertising and printing and this investment invariably spells success for the promoters. However, it is difficult to get this idea to permeate into the heads of some people who imagine a newspaper should not charge for publicity of that sort. Fortunately there are not many of that ilk in this country, but there are some and in time they may see the folly of their strange views on advertising.

WHY NOT BE FAIR?

While popular history, backed by one of the strongest churches in the world, gives credit to Christopher Columbus as being the discoverer of America, we must bear in mind the hard cold fact that John Cabot beat Columbus to the American continent by many months, yet his name is never heard in this connection. Children in our schools are taught to sing the praises of Columbus instead of being taught to give credit where credit is due. We are not saying that John Cabot should receive all honors being bestowed upon Columbus, but we do think of the two men John Cabot is entitled to equal rank with Columbus. Columbus landed on the island of Salvador, 700 miles from the mainland, while Cabot landed at Newfoundland and sailed down the Atlantic coast for many hundreds of miles. Both these men were navigators of the highest rank and were men who knew no fear. One was backed by the Queen of Spain and the other by the King of England. To Columbus must be given the honor of making known to the civilized world that there was land to the west, but to John Cabot belongs the honor of being first to set foot on the mainland of North America.

—Exchange.

CHRISTMAS IN THE OLD COUNTRY—SPECIAL ARRANGEMENTS

A visit to the Old Country is something that a great number of people are giving thought to in this season of the year, and many have already made plans to reach their friends in time for the Christmas and New Year season.

Canadian Pacific steamships are delectably popular for this trip, and to give extra special accommodation for those who are going overseas this season the Canadian Pacific Railway has arranged for a special train to connect with the S.S. "Montcalm" sailing from St. John, Tuesday, December 12. Through tourist sleepers will be operated from Edmonton at 10 a.m., Thursday, December 7, and from Calgary at 1.35 a.m., Friday, December 8, making connection with this special train leaving Winnipeg 9.20 a.m., December 9.

Special tourist sleepers from Calgary, Edmonton, via regular trains, will also be operated in connection with sailings from St. John of the S.S. "Montcalm" on December 1st, S.S. "Victorian" on December 10th, S.S. "Mellita" on December 19th, S.S. "Metakana" on December 14th.

All these tourist sleepers run right to the ship's side—no changes or inconvenience. They are the genuine plank to the steamer.

Robert Stead's Greatest Book

IN HAPPY NOVEL OF THE NORTHWEST

"Neighbourhood" is Nearer the Heart of Canada than Any Other of Famous Canadian Authors' Books. Romance of the Last Great Tide of Settlement in Saskatchewan Country is Big Theme.

You will never have to ask that question, "What is Canadian literature?" again when you have read Robert Stead's latest and, so far, his greatest novel, "Neighbourhood."

There are few Canadians who are not familiar with this author's famous novels, "The Homesteaders," "The Cowpunchers," and "Denton Grant."

Grant." This new book runs true to the Stead tradition of a good story, real humor, pure love and a real idea—even some real mystery, and it has more of the real atmosphere of life in it, than any other which has come to us in a long while. It is true writing, and will add fresh laurels to the fame of this already well-beloved author.

"Neighbourhood" relates how two families of young people, brother and sister, neighbours, in a little Ontario town, neighbours, fifteen years later on adjoining homesteads in the Saskatchewan country, find life and love. Their stories run smoothly until a young Englishman settles in the community and upsets all expectations, including the reader's. But the best part of "Neighbourhood" is the picture of the people who make up that far-scattered "Neighbourhood" of homesteaders. Jake is the old villain who finds "the excitement" for the gullible newcomer the "Sweeties" are a giant big-eyed Polak family who live in a cave that the precious live-stock may have builded shelter—and the widow, and the Scotch family—and the wedding! All of that is written of in the finest type, and places this Canadian book in high order among the best literature of to-day.

"NEIGHBOURHOOD" a happy novel of the Northwest, by Robert Stead. Hodder & Stoughton, Toronto, \$1.75.

The author's and publisher's banquet at the Mission Hall last night was well attended. As we were representative of neither, we are unable to give an extensive report.

Studebaker

"Built-in-Canada"

Excellence in Every Detail

The Studebaker Special Six upholds the best Studebaker traditions of mechanical excellence and body building skill.

Its 50-horsepower, detachable-head motor delivers great resources of quiet, smooth, flowing power and remarkable flexibility. Its perfected, dry-plate disc clutch makes gear shifting quiet and easy. The bearing equipment at the steering knuckles provides an ease of steering that every driver appreciates.

Included in its appointments are the rain-proof one-piece windshield; cowl lights; cowl ventilator; eight-day clock; proof transmission lock which reduces insurance rates 15 to 20%; massive headlights; tonneau light with long extension cord; windshield wipers; tool compartment in left front door.

large, rectangular plate glass window in rear; outside and inside door handles, and many other details that add to comfort and convenience.

Only because of Studebaker's experience, resources and the savings due to economies in manufacture, can Studebaker offer the Special Six at the exceptionally low price of \$1795.

The broad principle upon which Studebaker business is conducted and upon which it has prospered for seventy years, now grounded upon tradition, insures satisfaction to every body who deals with the House of Studebaker, and we solicit your valued patronage on this basis. This policy protects you better than the ordinary guarantees.

THIS IS A STUDEBAKER YEAR

NEXT SUNDAY AT BELLEVUE

The new community hall at Bellevue will be formally opened and dedicated for religious and community service on Sunday next. The impressive service of dedication will take place at 11 a.m., when Rev. A. A. Lytle will officiate, assisted by the pastor, Rev. Harry Peters.

In the afternoon the young people will be addressed by Mr. Lytle. Mr. Lytle will also preach at the 7.30 service in the evening.

A Thanksgiving supper and concert will be held on Monday evening. Supper will be served from 5 to 7 o'clock. The concert will start at 8 and will include all local district talent.

The new hall is quite attractive. The building covers an area of about 80 square feet and is built of brick tile on a full cement basement. The basement will be modestly equipped as a gymnasium and will have bath, shower sprays, toilets, etc. The main floor consists of a large, bright auditorium or assembly room with ladies assembly room, library, reading room, etc., near the entrance. The platform is amply large enough to accommodate a large choir and organ. The new pulpit has arrived and will be in place for the opening. The basement will be floored with hardwood on top of the cement, while the auditorium is also floored with hardwood.

It is expected that very large audiences will be in evidence next Sunday and Monday.

On the Sunday following the services will be continued, when Rev. Thomas Powell, superintendent of Methodist missions, will be the preacher.

Ex-Sergeant Caswell, of the A. F. P., is a visitor in Blairmore today.

See the opening announcement of The Cass Clothing Company elsewhere in this issue.

In all probability the Palm Cafe, Limited, will move into their new premises next week.

The Mine Rescue Car No. 1 is again on the Blairmore siding, in charge of Conductor Ed. Royle.

On account of forest fires in Maine, all hunters, by proclamation, have been ordered out of the forests in that state.

A special dispatch from England, via Doc Lillie's radio, we are informed that Lloyd George's divorce suit has resigned.

The annual meeting of the Ladies Curling Club, held at the home of Mrs. F. M. Pinkney on Tuesday evening was well attended.

The dance given at the Green hill Grill last night was well attended and enjoyable. Music was furnished by The Big 4 Orchestra.

The marriage of Mrs. Mary Barrett, of Calgary, to Henry Armstrong, of Beaton, B.C., took place at Coleman on Saturday evening last, Rev. D. K. Allan officiating.

Mine operators from all over Alberta, particularly in the Drumheller and Crows' Nest Pass fields, are being invited to the special coal meeting called by the Calgary Board of Trade for next Friday.

Beer by the carload may be unloaded at certain points in Alberta, which seems to be legal. But the retailer of that same beer is a lawbreaker and pays for the enforcement of the liquor act.

CANADIAN DOLLAR AT PREMIUM WORLD OVER

For the first time since the American Civil War, United States money was at a discount recently in Windsor, Ontario.

G. J. Lackner, manager of the Imperial Bank branch at Windsor, stated that Canadian money is now commanding a premium of 1-16 of 1 per cent in New York.

For five years Canadian money has been at a discount in Detroit. At the close of the great war it was discounted as high as 22 per cent. Since then the discount has gradually dropped until two months ago it was on a par with United States currency fluctuations, since then have been small. Canadian money rarely being quoted at more than 1 per cent discount.

During the American Civil War, when the Republic was making heavy borrowings, Yankee money was discounted as high as 55 per cent, here and was unacceptable almost at any rate to Canadians. The exchange gradually righted itself until par was reached again.

Canadian money is the first to reach par value with American money. With American funds at a discount here Canadian money now has a premium in all countries of the world.

OUR DEPARTED FRIENDS

Those old paint buckets under the house or in the closet. You need them while painting up last spring. They are about right now, to start a fire.

The special edition of a magazine or paper lying behind the kitchen cabinet—You never went back to read it the second time.

The shavings and scraps the carpenter left when they remodelled the house. They are stuck around in piles, in the basement and around the yard—Unwisely and dangerously.

The box and excelsior in which the furniture was packed. It's up in the attic and you are going to use it some time—Said that last year.

Those buckets you mixed the whitewash in last spring. They are around on the north side of the house. Thought it was best to leave them where the sun would never reach them.

The hat boxes and tissue paper which came around last Easter's hat and clothes. They are up in the attic with those from the Easter before last. They are doing no good—might do harm. Better clean up and get rid of them.

Take a look around your premises. Get those fire breeders out of your house and out of your yard. They belong to the dump heap, but will never get there until you start something. Start them now.—That's your job.

IF

After seeing a business man light a cigar and flip the match thoughtlessly into a corner of his office near a waste basket, a visitor would follow the following paraphrase of one of Kipling's best known poems:

"If you can toss a match into a clearing,

And never give a thought to put it out,

Or drop your cigarette butt without fearing,

That flames may kindle in the leaves about,

If you can knock the ashes from your brier,

Without a glance to see where they may fall,

And later find the forest all afire,

Where you have passed—with no one near to call;

If you drive your auto through the working,

And cast your stogie stub into the slash,

Unmindful of the danger therein lurking,

Or homes or happiness that you may smother;

If you can leave your campfire while the glowing,

No thought of industries that it may light,

Turned into charcoal are the coming night,

If you can start a fire beneath a

MINIMUM WAGE

BOARD MEETINGS

The itinerary of the Minimum Wage Board has been finally adopted, and the sessions are commencing at Medicine Hat on October 24.

Industries of the province have been classified into sections representing manufacturing, office employment, hotel and restaurant and personal service, laundries, dyeing and cleaning and retail trade.

The complete itinerary of the sittings of the Board is as follows: Medicine Hat, October 24; Lethbridge, October 25th; Blairmore, October 26th; Drumheller, October 27th; Calgary, October 28th and 29th; Wetaskiwin, November 1st; Edmonton, November 2nd and 3rd.

WILD BIRD SANCTUARIES

True sportsmen will highly commend the police and game officers operating in this province on the decision to enforce the regulations for the protection of the reserves, set aside as wild bird sanctuaries. These protected stopping places for the migratory birds, on their journey from the north to the south in the fall, and from the south to the north in the spring, will do much to preserve bird life, and further the interest of clear sport. Any visitor to the national parks at Banff or Jasper knows what the protection of wild game of all kinds in the parks has meant. The visitor can get in close touch with many of nature's creatures, and observe them following the life nature intended them to lead. Beavers, deer, mountain sheep, mountain goats, porcupines, and other smaller animals. When the antlered deer comes into your back yard and eats salt out of your hand, there is no semblance of "The Lives of the Hunted."

THE SUBSCRIPTION MAN

A preacher, at the close of his sermon, said: "Let all in the house who are paying their debts stand up!" Presently every man, woman and child, with one exception, rose to their feet. The preacher seated them and said: "Now, every man not paying his debts stand up," and this one exception, a care-worn, hungry-looking individual, clothed in his last summer's suit, slowly assumed a perpendicular position.

"How is it, my friend, that you are the only man not able to meet his obligations?" asked the minister.

"I run a newspaper," he answered, "and the good brethren here who stood up first are my subscribers, and—"

"Let us pray," exclaimed the minister.

If this question was asked in your church, what would you do, stand up or sit still?

BIG CUT IN FORDS

Announcement is made from Ford, Ontario, that a reduction of about \$50 a car on Fords will immediately become effective.

If Canadian prices follow the Detroit cut, it will mean a considerable saving to future Ford buyers. Here are the prices:

| | Detroit | Local | Probable |
|----------|---------|-------|----------|
| Touring | \$298 | \$323 | \$573 |
| Roadster | 269 | 580 | 330 |
| Chassis | 235 | 500 | 450 |
| Coupe | 530 | 946 | 806 |
| Sedan | 595 | 1043 | 993 |

Just what the Canadian duty and the sales tax does to the price in Canada may be seen from the above.

All desirous of taking courses in first aid are requested to hand their names in to James Crowder, nurse inspector. The class of instruction will begin November 1st, and will be held under supervision of the Workmen's Compensation Board of Alberta.

Arrangements have been made to deposit the colors of the 191st Battalion in the Methodist church, Medicine Hat, on Friday, October 29th. Captain Hill, formerly adjutant of the battalion, will be in charge of the color party. By kind permission of Major R. F. Harris, officer in command, an escort will be furnished by the 32nd Battalion. Lieutenant Colonel W. C. Brown requests all members of the 191st Battalion, resident in the Medicine Hat district or elsewhere, to parade in uniform at the Medicine Hat armory at 10 a.m. on Sunday, October 29th. A by number of the battalion desiring to borrow uniforms may do so on application to Major Harris.

Aberia Hotel men are organizing a petition for a plebiscite at the people of the province on the sale of beer in hotels, restaurants and clubs. To test a not-to-be-here will be the question. The present liquor act would be amended so far as concerns hotels, liquor, and hotel men claim that instead of their bedrooms being turned into bars, they would be able to conduct business decently, and that the amount of drinkiness and bootlegging would be reduced by the sale of beer.

QUEEN OF SHEBA
WILLIAM FOX Production

At The Orpheum Theatre Saturday

We believe firmly in the enforcement of the liquor act—without fear or partiality.

Following investigations by the R. C. M. P., three Eskimos have been arrested, charged with the murder of Robert S. James, a Newfoundland trapper, whose death in Buffalo last December was a great shock to the community. James' body was found in an excellent state of preservation with two bullet wounds in the back. The Eskimos were companions of the murdered man and have confessed to the murder.

Facts About Sound Waves

Animals and Birds Hear Much Better Than Man

During one of the big battles of the war the sounds of the terrific cannonading in progress were heard across the sky. Great parallel arcs of light and shade were viewed passing swiftly across the clouds, not by one person only, but by all the members of a battery of artillery. These bands moved with the exact speed of sound waves—at the rate of a mile in five seconds—and the space between the bands was larger for the big guns than for the small.

This strange sight lasted for about ten minutes, and appears to have depended upon the relative positions of the observers, the guns and the sun.

It is common knowledge that sound is caused by waves in gases, liquids or solids. In a vacuum, an empty space—sound does not exist. If you could fire a twelve-inch gun from the top of Mount Everest, the sound would be feeble. Could you carry it much higher, its discharge would be inaudible.

There are rays of light which the eye cannot see, and there are sound waves which the human ear cannot catch.

Ask yourself if you can hear the cry of a bat. Any person who, at the age of forty, is able to hear the thin squeak of the bat, has reason to congratulate himself on being possessed of exceptionally good hearing. The squeak is too high—it has too many vibrations per second to be heard by any ear that is not very delicate.

Some years ago Prof. Galton, the famous anthropologist, invented and constructed a whistle which, by means of an adjustable plug, could be rendered so shrill that presently it ceased to be heard by human ears.

But—here is the curious part of it—the sound of the whistle has ceased to be audible to any human ear, a dog was still able to hear it, and came readily when it was blown.

Animals and birds hear far better than man. It was noticed during the war that pheasants were very much disturbed by the noise of guns at sea, while even children (whose hearing is quicker than that of older folk) could hear nothing at all.

Sound travels better across water than across land. By actual experiment it has been found that across water a person could be distinctly heard, reading aloud, at a distance of 140 feet, whereas on land the same voice only traveled 76 feet.

Across ice, too, and particularly in hard frost, sound travels amazingly. Lt. Foster, on an Arctic expedition, found that he could converse with another man quite easily across the "mouth of a bay which was a mile and a quarter wide.

Perfect silence is far rarer than most persons imagine. Even in the quietest room in the depth of the country, on the calmest night, there are always sounds. Absolute silence is only found in deep caves and abandoned mines, and is a really terrifying phenomenon.

It makes the ear ache in a desperate effort to catch some sound, however tiny. In such a place the beating of one's own heart and the rush of blood through the arteries will be become perceptible.

A Busy Place

Wheat Pouring Through "Spout" at Head of the Lakes

Two hundred and seventy million bushels of wheat went through Port William and Port Arthur last year. That is much more than passed through the large United States shipping ports on Lake Superior and Lake Michigan. This does not mean that more wheat is grown in Western Canada than in the Western States. Such is not the case. But a vast amount of the crop in the central and western States goes to ports on the Pacific and the Gulf of Mexico, while part of it goes directly by rail to the Atlantic ports.

Nearly all the Western Canadian crop pours through the "spout" at the head of the Lakes, whether it proceeds thence by boat, or by rail after navigation has closed. —Edmonton Bulletin.

Hogs in the Movies

A special film on the best means devised in Alberta for the improvement of bacon, will be issued by the Provincial Department of Agriculture, acting in cooperation with the Federal Department of Agriculture. The film, which is over 5,000 feet in length, and contains all the details regarding the breeding of hogs for bacon production, will be ready for distribution on time for the series of conferences to be conducted this winter on the subject.

The earliest rise of the bird family is the greenfinch, which sometimes begins to sing at 2 o'clock on a summer morning.

W. N. U. 1441

Waiting a Million Years

Annual Loss of \$3,000,000,000 From Preventable Diseases and Deaths in the United States

The annual economic loss from preventable diseases and deaths in the United States amounts to \$3,000,000,000. Forty-five million persons lost \$300,000,000 days from illness and disease, other than industrial accidents, during 1930.

Industrial accidents annually cause an economic loss of \$1,000,000,000 and a loss of \$253,000,000 in wages, according to a recent report of the National Safety Council. Fully 75 per cent of industrial accidents can be prevented.

An insurance official asserts that 12,000,000 days a year can be saved the building industry by the introduction of safety methods. This is not to be wondered at when it is known that more than 11,000 persons died as a result of falls during the year 1930. And 1,000 persons were killed by falling from ladders.

The large plants are doing much to reduce accidents, and to keep their employees well. One big steel corporation is spending \$1,000,000 a year for safety work to protect its 270,000 employees. Between 1906 and 1912, this corporation reduced its accidents 43 per cent, and, in the past fourteen years it has saved over 26,000 of its workers from accidental deaths.

Many of the smaller concerns recognize the value of safety and health supervision of their employees, but are reluctant to adopt such departments because they fear that the cost would be prohibitive.

In the aggregate, there are more workers employed in the small plants than in the large plants. There are 20,000,000 workers in the United States who are not under any form of health supervision.—Nation's Business.

African's Teeth Passport

Colored Teeth Indicate Tribe to Which Owner Belongs

When a man of Central Africa is asked from where he comes his answer is a grin. This answer is perfectly satisfactory, because his teeth are filed and sometimes colored to show to what tribe he belongs.

The women of the Felletribe stain their teeth blue, yellow and purple, leaving a white tooth here and there. These women are sometimes "rainbows of fashion," with their contrasting colors. Sometimes the women stain their fingers, toes and hair also. Then they feel sure they are much more "dressed up" than any of their neighbors. In time of "war," or any kind of trouble among the tribes, the shaped or colored teeth are a good means of identification. A spy from another tribe can be detected immediately, and will not be able to prove an alibi. The dental work is done when the African is very young, and marks him all through his life.

Flies Are Tropical Insects

People in Alaska Are Not Troubled With Pests

Everybody knows that mosquitoes are a frightful pest in Alaska, but it is news to learn that houseflies do not exist there. This interesting fact was definitely ascertained by Dr. J. M. Aldrich, of the United States National Museum, in the course of a recent expedition, which he made for the purpose of studying Alaskan insects. He found two entirely new species of mosquitoes. House flies were abundant everywhere. But there were no houseflies. In vain did he explore grocery stores, restaurants, canneries, garbage dumps and other likely places for them. The fact is that the housefly is by origin a tropical insect. It cannot endure cold weather.

He Was Too Funny

A floor manager in a certain big department store in a western city recently lost his place because of his inability to refrain from indulging in witlings at the expense of customers.

One day there rushed up to him a fat woman, who had lost her husband in the store, and was much out of breath by reason of her unavailing search for him.

As soon as she could muster sufficient breath to do so, she said to the floor manager:

"I am looking for a small man with one eye."

"Well, madam," suggested the floor man, "if he is a very small man, perhaps you had better use both eyes."

Canada's Market

The United Kingdom was a better customer of Canada than the United States for the twelve months ending with July, according to a statement issued by the British Empire Marketing Board. The total exports of Canadian products to the United States for that period were valued at \$304,000,000, and to Great Britain and Ireland were nearly \$207,000,000.

Scene after the David Thompson Memorial Pageant, Windermere, British Columbia, during the distribution of prizes at the hotel

Failed to Reach Wrangel Island

Rescue Party Reports Arctic Ice Conditions Worry in Twenty Years

Telling of terrific winds in the Arctic regions north of the Siberian coast and the worst ice conditions in 25 years, Captain Joseph Bernard, with his schooner, Teddy Bear, has returned to Nome, Alaska, after failing to reach Wrangel Island to bring out the party headed by Allan R. Crawford, of Toronto, sent there last year by Vilhjalmur Stefansson to hold the island for Canada.

Sailing from Nome on August 20, the Teddy Bear reached East Cape four days later, and by August 28 had forced a passage through to Cape Vankarem. Here Captain Bernard met the schooner Amy, south-bound, which reported the Chukotka, the Silver Wave and the Blue Sea all frozen in the ice, 15 miles from North Cape.

The schooners Polar Bear and Eagle were also reported stuck by the ice, the latter about 25 miles south of North Cape. The crews were rescued, but both vessels are a total loss. Captain C. K. Larson, of the Amy, strongly advised Captain Bernard to return to Nome, as, in his view, it would be impossible for the Teddy Bear to reach Wrangel Island.

Buildings Bend With Pressure Of Wind

Movement of Steel Framework Is Very Slight

There is a popular impression that tall office buildings sway considerably in a gale of wind, says the Scientific American. That there is some movement is unquestionable, but it is very slight. It would be more correct to say that they bend rather than sway.

All natural growths, from the blade of grass to the giant fir tree, bend under the pressure of the wind, for they are flexible or elastic under any side pressure due to the wind they give way proportionately. The tall office building is also flexible, being built of steel that has high elasticity, and in a heavy wind, where the total side pressure may amount up to hundreds of tons, the steel framework will bend over before it.

Films In Education

Moving Pictures Are Being Recognized As Valuable Aids

We have always insisted that the educational value of the moving picture has never been adequately realized. Not only scientific, but historical subjects would be treated in this way. Think of the effect on the small boy of seeing the arid pages of his history unexpectedly jump into vivid life. Think of the budding classical scholar who suddenly discovered that the Odyssey, which he had imagined as a mere collection of grammatical pitfalls, was really the most enthralling story in the world! Arouse the interest and education will take care of itself. In the cinematograph the educationist may find his most potent and unexpected ally.—London Daily Express.

Dominions Revenue On Increase

Customs and excise revenue received during September showed an increase of \$4,172,216.46 over the corresponding month of last year. The total received in September, 1932, was \$24,010,405.54, as compared with \$19,295,189.08 during September, 1931. During the six months of the fiscal year ending September 30, 1932, the total collected was \$131,256,560.26, against \$115,636,186.34 during the corresponding period of the last fiscal year.

Radio Society in Paris

A society has been formed in the French capital for the purpose of broadcasting at least three times a day all news matter dear to the native Frenchman. At 5 p.m. a special compendium will be sent out for the benefit of American tourists.

Roman Ate Camels' Heels

Camels' heels, potted, was a holiday feast with the ancient Romans.

Diamonds and Food

On Moscow Markets

Largest Crowds Assemble Before Stalls Where Gems Are Displayed. Diamonds and foods are the chief attractions in the great open air markets of Moscow, which are running full blast this summer after several years of inactivity.

Food of all kinds is to be had in abundance, there being many varieties of vegetables and fruit, as well as butter, eggs, meat, flour and canned goods. The display reminds one of a market in the United States. The prices generally are higher than in America. The meats, fish, dried and smoked, are heaped in enormous piles in the small stalls in front of which the Moscow housewives assemble in throngs all day long in search of their wants of the moment.

Tons of potatoes and fresh vegetables just from the field are dumped into the stalls in the morning. Women of the neighborhood fill their baskets and then hurry from the market in an endless procession which continues until late in the afternoon.

Seeing the heaps of food of all kinds, even bottled pickles from London, it is difficult for foreign visitors to realize that in various parts of Russia today the American Relief Administration alone is feeding approximately 10,000,000 persons, chiefly as a result of effects brought about by war, revolution and the famine of last year.

In the diamond and jewelry section of the market the dealers, chiefly women, sit in long rows displaying their wares on their fingers and about their necks. Their blouses and shirt waists serve as a background for brooches, earrings, necklaces, tiny jewelled watches, and other articles of personal adornment which came down from the aristocracy, perhaps, through want and the "paw shop" route.

The diamonds are not of the best, but it is here that the largest crowds of the market's dealers, chiefly women, stand before the food stalls. Some are endeavoring to sell, others are haggling over the price of a stone, a watch, or some other piece of jewelry. The brighter the sun the greater the crowd in the row where the diamonds are shown. Many of the onlookers, obviously are attracted by the sparkling gems—yellow, perhaps, and speckled with carbon, but diamonds still, and good for tired, hungry eyes which for a change long for a feast of jewels as a reminder of other days.

An Ancient Turtle

Sent to a London Hotel From West Indies

A large turtle, said to be over 200 years old, has reached a London hotel from the West Indies. Covering an area, roughly of four feet by five and a half, the turtle is capable of bearing three tons on its back, and is so slow of movement that the chefs immediately named him Lightning. The slowness of his movements is only matched by his diet, which consists for the most part of air, plus an occasional handful of lettuce. But he has one vice, acquired as a result of an experiment on the part of a curious chef. He likes champagne, and when he has had some, like Oliver Twist, he asks for more.

Job For Thousands

Henry Ford, in an interview published by the Wall Street Journal, declared that he intended to employ his vast wealth in the future to provide jobs for thousands of additional men and to increase the wealth of the country by a large proportion.

"The Rockefeller and Carnegie distributions are all right," he said, "but I don't believe in that method."

Encourage Agriculture

All the immigration regulations in the world will not outweigh the laws of nature. We have got first to recognize that our country is an agricultural country, and our towns have to live upon the country, and that it is to the interest of our industries to fill up the country, not to squeeze the life out of it.—From the Montreal Witness.

The Feeding Of Sheep

Rations of Alfalfa, Roots and Grain Produce Splendid Results

Many experiments have been made at the Dominion Experimental Farms, and Stations in the feeding of lambs for winter finishing. In giving an account of the work, the Dominion Animal Husbandman divides the feeds under four headings, namely, dry roughages, succulent roughages, grain and mill-feed. Primarily, he says, the selection of such feeds should be to replace good pasture grass; grass being the ideal ration for sheep. Of the dry roughages, alfalfa hay is an easy leader, closely followed by fine clover hay and timothy hay. Alfalfa hay alone, however, is found less profitable than when mixed with succulent roughages such as roots or green oat sheaves. Proving the value of succulent roughages it was found that good quality timothy hay plus alfalfa was more profitable than clover hay alone, although good quality clover hay is more profitable in lamb feeding than timothy or similar grass hays. A hay made from peas and oats, well cured, will produce satisfactory gains, but rather less profitable than alfalfa or clover, or a mixture of these oat sheaves.

A limited amount of straw may be fed in finishing lambs, but only as a supplement to clover hay and roots. Generally speaking, says the Dominion Animal Husbandman in Pamphlet 15 of the Experimental Farms, "Finishing Lambs for the Flock," which can be obtained on application to the Publications Branch, Ottawa, the richer the hay and the better it is cured, the more profits will accrue in feeding it to lambs. Good succulent roughages, such as turnips, mangels, sugar beets, corn ensilage, pea and oat ensilage and the like, make the dry roughages and grain more palatable and more digestible. While the turnip is the safest root to feed in finishing lambs, mangels may have a dangerous influence on the kidneys of wethers and rams. Oats barley and feed wheat. The efficient grains for lamb finishing and should be fed whole or crushed, but never fine-ground. A mixture is better than any one grain singly. Corn is good in feeding when a short finish is required.

Elevator screenings, with dirt and black seed screenings, are valuable feeds. Under average conditions it is doubtful if any high percentages of mill-feeds can be fed profitably in lamb finishing. In concluding, the Dominion Husbandman says: "A ration containing good succulent roughage and properly balanced as to nutritive contents will almost invariably give greatest profits. As a rule it will not pay to exceed 1½ pounds of grain per lamb at the finish, nor will it be profitable to feed more than five pounds of any one roughage, and three to five pounds of dry roughage per day at any time during the finishing period."

Replacing Use of Money

Barter Is Again in Evidence In Parts of Germany

Barter is replacing the use of money in various parts of Germany as a result of the serious depreciation of the mark.

The Weimar Board, governing the agricultural schools at Triptitz and Rastow, has asked the nation for the winter term in rye instead of in money.

The Saxton Thuringian Power Company at Auma has announced that it will gladly receive, instead of cash, ten eggs, three pounds of wheat-flour, or potatoes, for each kilowatt hour of electricity consumed. Naumburg and Braunschweig physicians state that henceforth all rural patients will be expected to pay for medical attention in produce at his pre-war cost.

In 1914 a physician's call cost about five marks. At that time this would buy ten loaves of bread or three pounds of butter. The same quality of bread is now selling at 100 marks a loaf and butter is retailing at 260 marks a pound.

Canada's Rubber Trade

There are now 75 plants in Canada engaged in the manufacture of rubber goods, according to a recent bulletin issued by the Federal Bureau of Statistics. Of this number Ontario accounts for 24, Quebec 11. The annual production of rubber goods is valued at \$55,122,857, and of rubber footwear \$25,594,451. The capital investment in rubber goods factories is \$28,249,456, and in rubber footwear factories \$16,130,553.

The fourteenth century armor was so heavy that many young soldiers were deformed or permanently disabled by its weight.

There are more yuccas of public worship in Australia in proportion to the population than in any place else in the world.

Clothes and the Woman

A Little Dissertation on Style and Fashions

Recently the Lady Mayors of London opened an exhibition of women's clothes at Holland Park, one of the principal objects of the exhibition being to show what England can do in the matter of creative dress-designing. Apparently, skirts are to be longer this year, and bodices—the frocks being English it would be unparliamentary to say corsets—higher. All kinds of new embellishments of the feminine form have been thought out, or adapted from the fashions of other ages and other climates. It must be difficult to the point of impossibility to invent anything actually new for a woman to wear. Even the new veils which cover only the lower part of the face have an Oriental origin. That, however, need not render them less attractive, for we have the best authority for the theory that clothing in itself was originally a Mesopotamian invention. Of one thing we can be quite certain. Whether the fashions are new or old, whether they originate in London or Paris, whether they are intrinsically beautiful or not, they will look as lovely this year as in all preceding years when the women put them on. The fashions of a decade ago look ugly enough in old photographs, but how entrancing we found them at the time! The conversation of some women might lead people to believe that the clothes make the woman, but in sober truth the reverse is the case. Any man could tell them that. The Westminster Gazette.

Turk Again Master

Moslem Fanatics Determined to Wipe Out Christians In Asia Minor

The rebirth of Turkish military power, followed by the expulsion of the Greeks from Asia Minor, destroys the last hope of the Armenian people. The Turk is master once more throughout the Near East, and, though the Armenians took no part in the burning and looting of Turkish villages during the withdrawal of the Greeks from Anatolia, vengeance has been executed for all Christians indiscriminately, and the Armenians are once more again, dishonored and enslaved by the age-long oppressor. There is little doubt that Kemal Pasha and the fanatical Moslem soldiers he leads are determined to end the difficulties attendant upon the presence of a Christian minority in Asia Minor by wiping out that minority by massacre, deportation, arson and the enslavement of the young girls of Christian families in Turkish harems.—Toronto Globe.

Flying Fish Have Strong Wings

More Efficient for Flight Than Wings Of Birds

By studying the wing structure of flying fish, an authority on the flight of birds has found that their wings are some four or five times as efficient, for soaring flight, as the wings of birds. He attributed this, says Popular Mechanics to the fact that the fin rays formed projected ridges on the under surface of the wings. By experimenting with models fashioned on similar lines, he found that the fin ray caused a sheltered area to appear back of the ray when the model moved through the air. His conclusion is that this sheltered area acted as a force to drive the wing ahead when soaring.

**RED CROSS MEMBERSHIP
AND FINANCE DRIVE**

Every person who becomes or continues to be a member of the Alberta Division of the Canadian Red Cross when the call comes during the Membership and Finance Campaign to be held from November 5 to 11, will be doing his or her part to help carry on with greater effort and vigor its work for improvement of health, the prevention of disease and mitigation of suffering. This is the peace programme of the Society and it has emerged from the pioneer work in this connection with an enviable record. The development of the work, as it should be, is now being hampered by lack of funds.

This is the reason that the organization is appealing to the public for support during the campaign next month. Every person in Alberta who is financially able to, should at least become a member of the Society. Those who feel that they ought to do more will have an opportunity to make a donation over and above the regular membership fee during the week of the drive.

Any person who is familiar with the work that the Society is doing in Alberta has nothing but the highest of commendation to offer and every one of these citizens are giving the organization all the help possible. It has done a wonderful work in the care of sick and crippled children through the Junior Red Cross; in organizing medical and nursing service in pioneer districts; promoting social service in cities; in organizing disaster and emergency preparation, and in many other ways that might be mentioned.

Enrol a member and help this good work.

Enrolment of whole school to date, 440.

D. M. Jr-Conway, principal.

**MRS. GIOIA RELEASED
ON SUSPENDED SENTENCE**

Mrs. Mary Gioia and her husband, Nick Gioia, were tried at Macleod this week in connection with the mysterious death of Sam Gioia, a brother of Nick's, which took place at Hillcrest in July last. The original charge preferred was "murder," but this was reduced to that of manslaughter. At the preliminary and since, Mrs. Gioia maintained that she had murdered Sam Gioia in defending herself against an indecent attack from him. But this confession was not entertained by the court. To the charge of manslaughter, Mrs. Gioia pleaded not guilty, but the jury after one and a half hour's deliberation brought in a verdict of guilty against both Mary and Nick Gioia, recommending mercy.

Mr. Justice Walsh sentenced both to twelve months, but Mrs. Gioia was allowed out on suspended sentence.

Sam Villa, the third party, came up for trial yesterday. The charge preferred against Sam was similar, that of manslaughter, or slaying by neglect to provide the necessary medical aid to prolong life. Sam was released.

The dance given at Hillcrest under the auspices of the Ladies Football Club was a decided success and after paying all expenses the net sum of twenty-three dollars was netted. The music furnished was pronounced excellent.

The service at the Union church on Sunday evening next will take the form of a Mothers and Daughters service. Special music is being provided. The girls of the C. G. I. T. will form the choir and act as ushers.

**"How Does She Do It?
That's What I Want
To Know."**

She follows the same recipes I do, the same kind of flour, butter, eggs and flavoring and yet her cakes have a delightful something about them that I can't get. What's the reason?

WORLD HAPPENINGS BRIEFLY TOLD

Japan prefers Pacific coast cedar for interior house construction.

A Pole still living at the age of 132, claims to be the only survivor of Napoleon's armies.

The Department of Customs and Excise has ruled maple syrup to be exempt from the sales tax, as molasses.

The French Government will protest against the ruling with regard to prohibiting liquors on foreign vessels inside United States territorial waters.

The entire central committee of the All Russian trader union has been arrested by order of the Soviet supreme tribunal.

Returning from Baltimore to London, the King and Queen stopped at Edinburgh where His Majesty unveiled the King Edward VII. memorial at Holyrood Castle.

The largest single day's shipment of grain to Buffalo was made Oct. 10, when five ships cleared with a total of 1,487,000 bushels, all but 220,000 being wheat.

A Reuter despatch from Athens says Alexander Zaimis, former Greek Premier, has sent a telegram from abroad where he has been ill, announcing that he has sufficiently recovered to accept the premiership.

Premier Duggan is quoted as saying that the Ontario Government has ordered 150,000 feet of lumber already to all regions of Northern Ontario firms to build homes, and would order a million feet if necessary.

As a temporary method of combating the want of elevator facilities in the port of Vancouver, members of the grain section of the Merchants' Exchange have decided to ask prairie farmers to have their grain cleaned in Calgary before shipping.

John Henry Grady, native of Nova Scotia and a veteran of three wars, died recently in Vancouver, aged 77. He served in the Fenian Raids, in the Riel Rebellion and in the World War, the latter as a troop escort. He has lived in British Columbia 24 years.

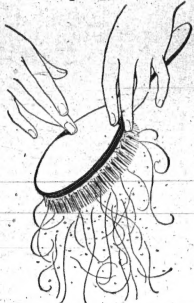

Japan has decided to restore the lease held of Kia Chow to China, on December 2. On that date Japanese troops will withdraw civil and military authority in the Kia Chow district, which will be handed over to China, and the Chinese garrisons will be hoisted for the first time since Germany acquired the territory in 1898.

New Process for Extracting Oil

Practical application of a process for extracting oil from the tar sand deposits of Fort McMurray, has now been made with a plant, installed by a company operating in that vicinity. The tar bed being worked is 150 feet thick.

A PITY TO LOSE ANOTHER HAIR

35c "Danderine" Saves Your Hair—Ends Dandruff!—Delightful Tonic

Only fools let hair fall out and dandruff stay. Neglect means a bald spot shortly. A little "Danderine" now will save your hair. This delightful tonic cleans the scalp of every particle of dandruff, tightens the hair-root pores, so the hair stops coming out and so the vitalizing oils, which are the very life and strength of the hair, cannot come away.

Danderine is not sticky or greasy. It has made weak, sick, neglected hair strong and healthy for millions of men and women. Your comb or brush is warning you. Hurry to any drug store and get a bottle now. Don't wait!

Something Wrong

Another one of those things that make you wonder is people complaining that they can't get jobs and farmers complaining that they can't get help—Winnipeg Free Press.

The Chinese objected to railway building because white men went through their ceremonies with their surveys and roads.

Production of Butter

Western Provinces Engaging More Extensively in Mixed Farming.

Figures giving the total quantity of dairy butter produced last year in Canada have recently been issued. These show that the total output for 1921 was 122,776,530 pounds, valued at \$45,893,682. This is an increase in quantity over the previous year of 11,054,862 pounds. Increased production is shown by all the provinces with the exception of Prince Edward Island, the largest proportionate increase, 36 per cent, being recorded by British Columbia. In order of dairying importance the provinces rank: Ontario, Quebec, Alberta, Manitoba, Saskatchewan, Nova Scotia, British Columbia, New Brunswick and Prince Edward Island. It is interesting to note that the three prairie provinces of Canada, Manitoba, Saskatchewan and Alberta, which are generally supposed to be exclusive grain growing areas, are also large producers of dairy products. Mixed farming is being more and more taken up throughout Western Canada, as it is found to be a very profitable branch of agriculture.

The Poor Man's Friend.—Put up in small bottles that are easily portable and sold for a very small sum, Dr. Thomas' Electric Oil possesses power in concentrated form. Its cheapness and the varied uses to which it can be put make it the poor man's friend. No dealer's stock is complete without it.

Parcels C.O.D.

C.O.D. (cash on delivery) parcel post service has recently been inaugurated by the Canadian Post Office Department. Under this new service a parcel of goods may be sent C.O.D. and the cost of the goods or article is collected by the postman. The money is remitted to the sender by the post office by a money order. It is expected that the C.O.D. system will prove a great advantage to people living in the rural districts of Canada, which are served by the rural mail delivery that gives service to over 75,000 miles of road to about one million persons.

Good-bye Asthma. Persons suffering from that extremely trying trouble known as asthma know what it is to long with all their hearts for escape from a tyrant. Never do they know when an attack may come and they know that to struggle unaided is vain. With Dr. J. D. Kellogg's Asthma Remedy at hand, however, they can say good-bye to their enemy and enjoy life again. It helps at once.

American Lumbermen for B.C.

The placing of shingles on the free list has caused American manufacturers to look to British Columbia to establish mills, according to Seattle dispatches. One large manufacturer has announced that he will eventually dismantle four large mills now operating in Washington, and remove them to British Columbia. The position of the Americans is rendered more difficult by the fact that there is a duty of \$1.00 a thousand on logs. Vast quantities of cedar logs are annually exported to Washington and Oregon mills from British Columbia.

The ease with which corns and warts can be removed by Holloway's Corn Remover is its strongest recommendation. It seldom fails.

Use Tractors in Yukon

Caterpillar tractors will be given their first trial in winter transportation in the Yukon next winter. The "Frodo" Company, which has been using the caterpillar this summer with success, will employ the "tank" truck to haul silver ore from the Mayo mines next winter, if it proves practicable. The shipments this winter are expected to double last season's in value. Most of it is already mined and sacked.

"It is the mark of a superior mind to understand and be influenced by the superiority of others."

Minard's Liniment used by Physicians

Quite Snappy

Now it's knicker and the sleeveless coat for sport, and one wonders how they ever got on without them. The popular sport blouse and wool hose in two-toned effect add much to the smartness of the outfit, which is ideal for golf, a horseback canter and regular sport wear.

HEALTHY CHILDREN

ALWAYS SLEEP WELL

The healthy child sleeps well and during its waking hours is never cross but always happy and laughing. It is only the sickly child that is cross and peevish. Mothers, if your children do not sleep well, if they are cross and cry a great deal, give them Baby's Own Tablets and they will soon be well and happy again. The Tablets are a mild but thorough laxative which regulate the bowels, sweeten the stomach, banish constipation, colic and indigestion, and promote healthy sleep. They are absolutely guaranteed free from opiates and may be given to the newborn babe with perfect safety. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Java Supplies Quinine

The cinchona forest in Java covers about 25,000 acres. The larger part of the world's supply of quinine comes from that country.

Hall's Catarrh Medicine

Those who are in a "run down" condition will notice that Catarrh bothers them much more than when they are in good health. It is a local disease, it is easily cured, and it is sold in small bottles. HALL'S CATARRH MEDICINE is a tonic and acts through the blood upon the mucous surfaces of the body, thus reducing the inflammation and assisting Nature in restoring normal conditions. All Druggists. Circulars free. J. C. Cheney & Co., Toledo, Ohio.

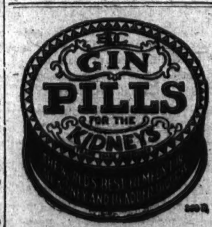

Roller Bearings for Trains

Successful roller bearings for trains, for a long time a dream of engineers, seem to have been produced in England. One man pushed with ease a twenty-seven ton coach equipped with the new bearings, whereas it had taken seven men to push it without the bearings. It is expected that the saving in fuel will be about thirty per cent.

The Oil for the Farmer.—A bottle of Dr. Thomas' Electric Oil in the farm house will save many a journey for the doctor. It is not only good for the children when taken with colds and croup, and for the mature who suffer from pains and aches, but there are directions for its use on sick cattle. There should always be a bottle of it in the house.

Hard to Understand When one reflects that a savage isn't required to wear a saw-edged collar, it is rather difficult to understand what makes him savage.—Birmingham News.

Spain Bars Organ Grinders In Spain, street performers on the guitar are licensed, while organ grinders are rigorously suppressed.

Canada's Winter is Cold

Stanfield's Unshrinkable Underwear is soft, warm and durable. Stanfield's Unshrinkable Underwear is neither low priced, nor high priced, but fair priced.

Stanfield's Unshrinkable Underwear gives more than it costs in warmth, ease, comfort, health protection and sturdy wear. It is the soundest economy to buy.

Made in combinations and two-piece suits, in full length, knee and elbow length, and sleeveless for men and women. Stanfield's Adjustable Combinations and Sleepers for growing children (pat).

Perils of the Sea

Puny Efforts of Man Against the Mighty Forces of Nature

The loss within a period of three weeks of three mighty warships, representing Britain, France and Japan, is a reminder, as the tragedy of the Titanic was a startling reminder some years ago, that notwithstanding all that man has done, notwithstanding the mighty greyhounds that he has constructed, all his engineering feats have failed to conquer the perils of the sea. Today, as ever, the words of Byron apply: Roll on thou deep and dark blue ocean roll. Ten thousand ships sail over thee in vain.

Some day, perhaps, men will build ships that will be immune from the might of the ocean; but not yet. Today, whether it be in the air, or upon the sea, the struggle of man against nature, and especially against the insatiable might of the vast deep, remains without achievement. Perhaps, too, it is well. Perhaps it is for good that men should be occasionally reminded of a power beside which their achievements and their efforts still seem puny.—From the Ottawa Journal.

Canada's Fire Loss

Property and Lives Sacrificed Through Ignorance and Carelessness

Last year \$45,000,000 worth of insurable property was destroyed by fire, in addition to the heavy loss from forest fires. There were also 336 lives lost, about sixty per cent. of the fatalities occurring in the burning of dwelling houses, and the large majority of the victims being children under twelve years of age. During the past decade, the property loss has been \$250,000,000, apart from forest conflagrations, and the loss of life totalled more than 2,000, mostly children. The per capita loss of property through fire in Canada is often times as great as the average loss to European countries. And constant investigation of fires in Canada has demonstrated that the chief causes of the enormous loss of property and the tragic loss of life are nothing else than ignorance and carelessness on the part of people.

Close Quarters

Australian ad.—"For Sale—Baker's business; good trade, large oven, owner's been in it for twelve years."

For years Mother Graves's Worm Exterminator has ranked as a reliable worm preparation and it always maintains its reputation.

As Described

"I met a woman named Brown yesterday and wondered if she was your wife. I don't know Mrs. Brown—what is she like?" "She's a woman of fifty who does not look more than forty, imagines she looks only thirty, dresses as if she were twenty and talks as if she were ten."—Boston Transcript.

Open For Grazing

The Saskatchewan Government has completed its arrangements with the Federal authorities for taking over the Masador ranch and operating it for community pasture. A portion of the ranch will be used for community grazing this coming winter.

Every dollar spent in your home town is a boost for the community.

Keep Minard's Liniment in the house

"Cascarets" 10c

Ready "Bayer" boxes of 12 tablets—also bottles of 24 and 100—Druggists. Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monheim, Germany. While it is well known that Aspirin is a trademark of Bayer Manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Local and General Items

For funeral flowers phone 212. Crow's Nest Pass Undertaking Co.

About thirty-four per cent. of the cars now being used in L. d. are made in Canada.

The regular fortnightly meeting of the town council takes place on Monday night next.

Sergt. Scott, of the A. P. P., was in Macleod this week as a witness in the Gils manslaughter trial.

Most of the liquor consumed in the central provinces of Canada is subject to inspection by bootleggers.

A Newfoundland lawyer has been sentenced to two years imprisonment for misappropriating trust funds.

J. M. Windsor, former manager of the local branch of the Union Bank of Canada, is meeting old friends here for a few days.

A movement towards total prohibition throughout Eastern Thrace will no doubt cause an influx of bootleggers into that country.

It doesn't take a woman very long to discover that she drew a blank in the matrimonial lottery, but her dying day she believes her husband drew a prize.

The F. M. Thompson Co. announce that a display of ladies fall coats, etc., will be at their store on Tuesday next in charge of Mr. Freebairn, of Pincher Creek.

Miss Story, in charge of girls' work in the province, under the Methodist Church, was in town on Monday, and that night addressed a meeting of C. G. I. T. leaders at the Union church.

The marriage of Miss Florence Lynch, daughter of Mr. and Mrs. W. J. Lynch, and Mr. D. C. Coleman, of Winnipeg, vice-president of the C. P. R. western division, will take place in New York on October the 28th.

The Board of Trade meeting held in the L. O. O. F. hall on Monday night was not well attended, but a very interesting discussion of various subjects took place. W. J. Bartlett was elected to the executive committee.

A judge in delivering the charge to the jury, said: "Gentlemen you have heard the evidence. The indictment says the prisoner was arrested for stealing pigs. The offense seems to be getting a common one. The time is coming when this must be put a stop to—otherwise, gentlemen, we shall none of us be safe."

Herbert Wilson, former evangelist, convicted of the murder of Herbert Cox during an attempted jail break several months ago, escaped from the county jail at Los Angeles, California. Wilson, armed with a revolver, held up and shot the gate man at the jail, then shot one of the turnkeys and taking the keys, opened the doors to his liberty. He and his party were, however, captured, after but twenty-four hours of liberty.

Only millionaires can carry on extensive correspondence from Russia to Canada. A letter mailed in Russia for Canada costs 450,000 rubles for the first ounce and 225,000 rubles for each succeeding ounce or fraction, according to the October supplement of the Canadian official postal guide. One silver dime, Canadian money, is worth 450,000 of the Russian rubles which flow from the Soviet printing plants.

When Benny Swim, a twice-repeated murderer of his cousin, was being executed in New Brunswick recently, the trap was tripped three times and a total of nineteen minutes was consumed before Swim was officially pronounced dead. Two hangmen were employed and both gave fictitious names.

Prospective bootleggers in L. d. are organizing for prohibition in that country.

Wives are purchased on the installment plan among certain tribes in Africa.

One of our jewelers advertises "Watch for a lady of superior design and movement."

V. J. Kates was fined \$200 and costs for having been of over strength in his possession.

A number of local Oddfellows will pay a visit to the Michel Lodge on Friday night of this week.

A Chinaman at Bellevue was assessed \$250 and costs by Magistrate Gresham for having sold "hooch."

Several red light districts were in evidence in town last week, owing to several breaks in the water main.

According to an advertisement elsewhere in this paper, Blairmore is soon to have a steam laundry.

Mr. and Mrs. Alex. M. Morrison and Mrs. Rippon were Cole man visitors by motor to Lethbridge this week.

Quite a number of young people from Hillcrest, Bellevue and Coleman came to "Kiss Me" at the Orpheum Theatre last night.

The early part of the week we were out on the prairie in quest of chicken. Most of the creatures we saw seemed to maintain an attitude of indifference.

The new bridge across Lyon Creek will be completed this week and will add very materially to the appearance of Victoria Street in that locality.

Ex-Sergt. J. B. Davies, formerly with the 11th C. M. R., and C. A. S. G., now editor of the Canadian Advocate, Lethbridge, was a visitor here this week.

Mr. Herchmer, Fernie lawyer, was in Lethbridge this week. Mr. Herchmer will likely be associated with the defence counsel in the Piccarilli murder case.

Major-General Sir John Carson, one of Montreal's leading business men and a prominent figure in milling circles, died at his home at Montreal on Friday last.

At a recent meeting in Toronto, the Presbyterian association decided unanimously to maintain and defend the Presbyterian Church in Canada and to oppose union.

Following the light snowstorm of Sunday night, large flocks of ducks and geese were seen moving south. The fine warm days since, however, has caused them to somewhat retract their flight.

It is stated that unless an injunction is granted the Cunard line, the British government probably will protest formally through the foreign office against the ruling prohibiting liquors on foreign ships in United States waters.

The Lethbridge Arena drive for finances seems to be going strong and it is expected that by now the full amount of fifteen thousand dollars will have been subscribed. According to plans, the new arena at Lethbridge will be similar to the Blairmore arena.

Work of grading for the new spur line leading from Crow's Nest Lake to the coal properties of the Alberta-Spokane Coal & Coke Co. is progressing. About fifty men are at present employed with several teams. The coal properties are about eight miles south and the track will follow the line of Glacier creek.
